animal would be killed and eaten by all members of the horde in a ritual feast. Once Freud had developed the basic ideas of psychoanalysis he found religion a promising subject of study. He begins with the conviction that religious behaviour is irrational and located within the unconscious, and he seeks out to prove exactly that.

At the same time, human beings have to face the prospect of death and the fact that ominous realities such as disease and disaster render them helpless. The book received several negative reviews, and some criticism from historians, but has been praised by authors critical of Freud and psychoanalysis. These bountiful psychoanalytic insights are in the very air we breathe.

In it the observations Freud made are described and the theoretical ideas he put forward for explaining them are set out. Manuscripts for the commentaries are always invited.

The adequacy of Freud's explanations are judged against the logical and scientific standards of Freud's own time.

He treats symptoms with possible physiological causes — arthritis, say, or ovarian cysts — as obvious consequences of hysteria.

Sigmund Fraud?

Included is a compilation of major criticisms of the methodology and assumptions of Freudian theory and a new comprehensive afterword by the author surveying the relevant literature published since 1989. But despite this distinction, Freud seems to think that religious beliefs are delusions. Book is in typical used-Good Condition.
