## Nighttime Bed

The recommended starting dose is 25 mg for children six to 12 years of age and 50 mg for those older than 12 years. Children with bedwetting may feel like they cannot go to sleepovers with their friends or overnight camps. Please visit to see if there is temporary guidance issued by NICE in relation to the management of this condition, which may vary from the information given below.

## Bedwetting: Causes & Treatment

The current trend for later toilet training means a number of children will start pre-school nursery classes still in nappies. Education and Resources for Improving Childhood Continence 2013 Survey Reveals 40% of Children with Continence Problems Experience Bullying. As it happens, a more serious side effect is a cardiac arrhythmia! Rarely, adults who did not previously experience enuresis will begin to experience bedwetting.

## Enuresis

If bedtime is at 8 p.

## Nocturnal Enuresis in Children. Bedwetting in Children

They do not awaken when the urge to urinate strikes. Non-monosymptomatic nocturnal enuresis NMNE refers to children who wet the bed at night and have additional daytime Studies which have looked at bed wetting have shown that it is a common disorder affecting 20% of 5 year olds, 10% of 10 year olds and 3% of 15 year olds. When deficient Kidney-Yang fails to control the Bladder and also to warm the Triple Burner, copious water runs downwards to fill the Bladder, resulting in nocturnal enuresis.
