**The Obama Administration Targets  
Coal Every Which Way It Can**

For this reason only occurrence records

for species monitored by KSNPC were used to generate richness values. Early successional forests in Kentucky were created by coal mining, recently harvested forests, or abandoned farms that were reverting to forests, most all of which were hardwood stands Sole 1999.

## AP Environmental Law Summary List

According to the USFS there are three types of monitoring efforts that should be used in order to truly determine the state of habitats or species. In general, the lizards tend to prefer dry, open areas although a few species e. This graphic shows the open water bodies black and associated wetlands shades of gray between the NWI Version 2 data left image and the National Hydrography Dataset right image.

## List of coal mines in the United States

All data collected during these monitoring efforts must be based on sound research design and appropriate statistical methodology regardless of who or what organization is collecting data. Staff are continuously kept current with the latest theories and techniques in ecological science, monitoring and research, and human dimensions.

## Kentucky Department of Fish & Wildlife Wildlife Action Plan

Conservation actions are ranked within a habitat guild.

## AP Environmental Law Summary List

Specific methodology and results are covered for each taxonomic group in the following sections.

### **Ecosystem development and natural succession in surface coal mine reclamation**

It has long been assumed that evening bats migrate to the southern part of their range for the winter but it is likely that some overwinter in Kentucky. Small mammal species of special concern in Pennsylvania and adjacent states: an overview. According to the Appeals Court, EPA has the authority to issue enhanced coordination procedures for surface mine permits.

### **AP Environmental Law Summary List**

Today, NWI data are being updated by the FWS at a rate of 2% per year with the help of outside partners. American Society of Mammalogy, Mammalian Species 70:5 pages.

### **Ecosystem development and natural succession in surface coal mine reclamation**

Key Habitat Habitat throughout Kentucky distribution: Overall POOR, but GOOD in some sites.
