The Genetics of *Aspergillus nidulans*

Generation of a *pcbC* null mutant and different complementation strains In the next set of experiments, we constructed strains lacking the *pcbC* gene Fig.

Genetic manipulation of *Aspergillus nidulans* : meiotic progeny for genetic analysis and strain construction

Both were nonsynonymous coding mutations with evidence for local linkage disequilibrium. Each month we choose a handful of papers that stood out to us as highlights. Deep cutaneous fungal infections in solid-organ transplant recipients This retrospective, observational, multicentre study was conducted in France to determine deep cutaneous fungal infections DCFIs diagnostic characteristics and outcomes with treatments in adult solid-organ transplant recipients.
