The Economist Henry Thoreau & Enterprise

Henry David Thoreau: A Life. Leaven, which some deem the soul of bread, the spiritus which fills its cellular tissue, which is religiously preserved like the vestal fire—some precious bottleful, I suppose, first brought over in the Mayflower, did the business for America, and its influence is still rising, swelling, spreading, in cerealian billows over the land—this seed I regularly and faithfully procured from the village, till at length one morning I forgot the rules, and scalded my yeast; by which accident I discovered that even this was not indispensable—for my discoveries were not by the synthetic but analytic process—and I have gladly omitted it since, though most housewives earnestly assured me that safe and wholesome bread without yeast might not be, and elderly people prophesied a speedy decay of the vital forces. It focuses on the cultural conditions in the time of Thoreau, his awareness of them, and his responses to them as a literary artist who identified his writing as his vocation.

Thoughts on “Economy” by Henry David Thoreau

What pains we accordingly take, not only with our Food, and Clothing, and Shelter, but with our beds, which are our night—clothes, robbing the nests and breasts of birds to prepare this shelter within a shelter, as the mole has its bed of grass and leaves at the end of its burrow! Granted that some public works would not have been constructed without this aid, and let man share the glory of such with the ox and horse; does it follow that he could not have accomplished works yet more worthy of himself in that case? The roof was the soundest part, though a good deal warped and made brittle by the sun. Boston, Ticknor and Fields — via Internet Archive.

Henry David Thoreau

When I consider how our houses are built and paid for, or not paid for, and their internal economy managed and sustained, I wonder that the floor does not give way under the visitor while he is admiring the gewgaws upon the mantelpiece, and let him through into the cellar, to some solid and honest though earthy foundation.
