Although he cited us,³ he overlooked the evidence we provided indicating that the Bacloville article⁴ was published without acknowledging major changes to the initial protocol, affecting the primary outcome. A review of clinical practice of child therapy follows, including clinical assessment, formulating cases, and selecting treatment as well as a chapter on therapy in the managed care environment. Coincidentally although as skeptics, we do not believe in coincidence , the initial statistical team was changed when data were sold to the French pharmaceutical company applying for the marketing authorization in France.
