Marchand, H. (1969). The categories and types of present

In carrying out the analysis, it adopts two approaches.

[Marchand, H. The categories and types of present

This paper offers a multi-layer description of the morphological, phonological, syntactic and semantic aspects of the behaviour of suffixes and final combining forms which function as heads in morphologically complex and compound words in English, both established and new ones.

Headhood of suffixes and final combining forms in english word formation in: Acta Linguistica Hungarica Volume 54 Issue 4 (2007)

Studies in honor of Günter Radden, 69—97.

Formats and Editions of The categories and types of present

Corpus studies can inform a researcher about the current state of the lexicon, a critical first step, but importantly are completely uninformative when it comes to questions of whether and how phonesthemes are represented in the minds of language users.

On frequency, transparency and productivity

While phonesthemes have mostly been identified in the onsets of words and syllables, they can have other forms. Cite this chapter as: Baayen H.
