Construction risk knowledge management in BIM using ontology and semantic web technology

Others followed when more and better Web tools became available.

Semantic Web and Semantic Technology Trends in 2019

Similar initiatives include RDFa, and Schema. Another advantage is that the system supports visualization in the process of search and mining, which would greatly help a normal user to understand the knowledge inside the ontological data. This workshop aims to serve as a gathering point for researchers and industry interested in CKGs to discuss current challenges and future solutions, and raise awareness about this emerging topic to a more broader Semantic Web community.

Semantic Web Technologies for the Internet of Things: Systematic Literature Review

The main point here is that syntactic divergence is no longer a hindrance. This could be information about the human-understandable content of the document such as the creator, title, description, etc.
