z/OS Communications Server Overview

For more than 40 years, IBM® mainframes have supported an extraordinary portion of the world's computing work, providing centralized corporate databases and mission-critical enterprise-wide applications. For a production environment, the online store uses ports 80 and 443, by default. We also include helpful tutorial information in the appendixes of this book because security technologies can be quite complex.

Firewall settings for Microsoft Dynamics AX components

For more information about , see. Only the first six host names are used in the hlq.

Communications server for z/OS V1R2 TCP/IP implementation guide (eBook, 2002) [vip.stumagz.com]

Centralized policy server Chapter 6. It presents a systematic approach to build total systems solutions that combine policies, procedures, risk analysis, threat assessment through attack trees, honeypots, audits, and commercially available security packages to secure the modern IT assets applications, databases, hosts, middleware services and platforms as well as the paths the wireless plus wired network to these assets. If you do not enable the Web Server in Windows Firewall, you can view the site only from the local server.

IBM z/OS V2R2 Communications Server TCP/IP Implementation: Volume 4 Security and Policy

Retail online store Web server Exclude the ports that are used by the Retail online store web site. Input is a master configuration source file.

IBM z/OS V2R2 Communications Server TCP/IP Implementation: Volume 4 Security and Policy

By default, Synch Service uses port 16750. OSA integrates several hardware features and supports many networking transport protocols.

Guideline: You must consider the send buffer size and the receive window size.

Guideline: You must consider the send buffer size and the receive window size.
