**How to Add Special Effects to YouTube Videos**

Step 3: Use the eyedropper to select your original color and then click the diamond icon to add or remove a keyframe.

**How to Make a Monster: Tips for Creating DIY Special Effects**

Filmora Video Editor supports all common video, audio and photo formats that can be transferred from various camcorders, cameras and mobile phones. It offers the most natural-looking way to integrate your subject into your video. We are not acting as licensed professionals, instead we study every topic the best way we can to provide accurate information.

**SkillShare**

In the pack you will find all for creating the most believable scenes. You can even use Add from web to find content on Bing. We cover everything you need to know about audio, shot composition, and lighting.

**Tools**

In plain English, you can alter the behavior of an element in a frame or the entire frame itself by setting a keyframe value at one point in your timeline and then a different keyframe value later in the timeline, your parameters will change from one value to the other over that time period. Add effects Using the power of Windows 10, you can add 3D objects or special effects to your photos and video clips.
