Universal (metaphysics)

I did not regard it as appropriate to decide between their views.

Ontology and The Problem of Universals: An Objectivist Comments

Augustine never explicitly raised the problem, but for example Aquinas, who among others did, provided the following rather intuitive solution for it ST1, q. At worst, it is a meaningless utterance.

What is the Problem of Universals? on JSTOR

If the apple is red, that is because there is a red trope, a red individual, that is a member of that bundle or complex. Although this nature understood in the intellect has the notion of a universal in relation to things outside the soul because it is one likeness of them all , as the nature has existence in this intellect or in that one, it is a certain particular understood species.

The Problem of Universals in Early Modern Philosophy

Scotus believes that this is the solution to how God can know individuals.

What is the Problem of Universals? on JSTOR

Now, a universal either exists in reality independently of a mind conceiving of it, or it only exists in the mind. And in this sense but in this sense alone it more intimately participates in the immaterial divine nature than any corporeal nature possibly can.

Charles Landesman, The Problem of Universals

The number 7 is the sum of 3+4, 2+5, 6+1, 0+7.
