Ultracentrifugation

These are selected from pre-defined solutions in the database that contain a buffer solution and one or more analytes proteins, nucleic acids, carbohydrates, or others. In addition, we will use a real-time system to ensure correct timing. This is a clear advantage for methods which apply pairwise subtraction of consecutive scans to obtain a time derivative of the concentration profiles.

Optical methods in ultracentrifugation, electrophoresis, and diffusion, with a guide to the interpretation of records.

European Biophysics Journal, 39 3 , 347-359.

Optical methods in ultracentrifugation, electrophoresis, and diffusion (1974 edition)

Surface-structure-regulated cell-membrane penetration by monolayer-protected nanoparticles. Wavelength accuracy of the XL-A and the MWL-AUC. An important aspect of GMP operation is a verifiable data management policy where data ownership is tightly controlled, data are stored in well-defined structured linkages where all data transactions can be audited and timestamped, a proper chain of data custody can be assured, and access by authorized individuals can be verified.

Performance of a fast fiber based UV/Vis multiwavelength detector for the analytical ultracentrifuge

Demeler B, Nguyen TL, Gorbet GE, Schirf V, Brookes EH, Mulvaney P, El-Ballouli AO, Pan J, Bakr OM, Demeler AK, Hernandez Uribe BI, Bhattarai N, Whetten RL. UltraScan relies on the following dependencies, all of which are available under open source licenses: Qt 5.
